Positive Influence	3																						
Qualifications, Skills & Experience																							
<ul style="list-style-type: none"> <li>• Experience of working in a fast-paced delivery environment and of building robust test automation solutions.</li> <li>• Significant experience of creating, designing and executing automated test scripts using Selenium WebDriver with C#.</li> <li>• Experience in using SpecFlow (or Cucumber) and an understanding of the BDD Framework.</li> <li>• Experience of scripting in C# language (+ Java).</li> <li>• Experience in using frameworks such as RestAssured or RestSharp to automate testing RESTful APIs.</li> <li>• Experience in API/Services testing and using tools like SoapUI, Postman.</li> <li>• Skilled at creating UI and integration tests in a variety of tools</li> </ul>																							
Key Accountabilities																							
<ul style="list-style-type: none"> <li>• Define and develop automation frameworks for Web and API/Services.</li> <li>• Develop and maintain automation for system, integration and regression suite of tests.</li> <li>• Evolve the current automation packs and determine opportunities for success.</li> <li>• Actively collaborate with developers and key stakeholders to clarify requirements, including automatability, testability, consistency and completeness.</li> <li>• Seek to explore opportunities in Non-Functional Testing.</li> <li>• Provide guidance and subject matter expertise on automated testing methodologies and processes.</li> <li>• Ensure adherence to agile testing principles and Systems Development Lifecycle including quality standards.</li> <li>• Develop test approaches in line with the Test Strategy.</li> <li>• Encourage and facilitate 'bug prevention over bug detection'.</li> <li>• Proactively look to provide pathways to identify issues, improve quality, and mitigate risks.</li> <li>• Complete script/peer reviews ensuring both consistency of quality and relevance of written tests to the solution.</li> <li>• To gain in-depth understanding of the Society's IT systems and end to end business processes.</li> <li>• Contributes effectively to the process of test planning and estimation.</li> <li>• Participation in the QA community of practice.</li> <li>• Contribute to the requirements for environment, data, resources and tools.</li> <li>• Produce a weekly report on system quality and collect metrics on test progress.</li> <li>• Provide support to business users during the execution of testing acting as a point of contact to raise, investigate and resolve issues.</li> </ul>																							

- Experience of cross-device and cross-browser testing using tools such as BrowserStack.
- Ability to organize, manage and prioritise own workload to ensure deadlines are met.
- Strong analytical approach.
- Attention to detail, with a logical approach to problem solving and an investigative and inquisitive mind.
- Good team player, self-motivated, proactive and customer orientated.

Desirable:

- Exposure to CI/CD build pipelines.
- Proficient in Git, SVN or equivalent.
- Experience of TeamCity or equivalent (such as Jenkins).
- Exposure to Azure or AWS cloud computing service.
- Exposure to a DevOps environment.
- Experience of Non-Functional Testing such as Usability, Performance, and Security testing would be highly advantageous.
- Tech savvy with appreciation of latest tools and trends.
- Engagement with the local industry test automation/QA community.

### Internal & External Relationships

#### Internal

You will be a key member of the software development team, working across multiple agile teams and projects. You will work especially closely with Developers, Assistant Testers and Test Managers. These contacts will involve discussing testing related matters.

- To participate in the use and development of departmental procedures.
- To improve knowledge of the Society's business and operation in all business areas.
- To adhere to all relevant regulatory rules and guidance applicable to the role.
- To maintain required standards of the Conduct Rules at all times in accordance with prevailing regulatory requirements.
- To maintain full awareness of and conformance to the Risk Management Framework including but not limited to the Information Security and Data Governance supporting frameworks.
